Other information

- The Farm - Hygge Farms is a full circle farm, we reduce our footprint by using LED lighting and limit our waste by recycling it either as compost for our garden or food for our animals. We raise our own meat (chickens, ducks, and pigs) and most of our vegetables in the summer.

- Beliefs - We believe that creating a better quality of life for ourselves and our employees is translated into the quality of our product. Each employee is paid based on his/her performance creating a workplace where everyone feels well cared for and needed. Everyone has to have a job to survive however, having a job that is rewarding and a place where everyone wants to be is the atmosphere we strive to create.
