1. What tier size is your grow?

Hygge Farms is an indoor tier 1 Producer/Processor

2. How long has your farm been in the industry?

Hygge Farms was started in 2018 by Paige and Brandon, who have been cultivating cannabis commercially since 2009

3. Do you currently offer medically geared products?

All of our flower is produced without pesticides and could be considered Medically compliant however, we are not currently testing for heavy metals

4. What brand(s) do you operate under?

We only sell products that we produce on site with our team. Hygge Farms

5. What products do you currently offer to the i502 market?

We are known for our consistent flower and great burning joints. Our 8-0.5g joint packs are packed with all small buds making them very popular. We offer flower and joints.

6. What is your growing medium?

We cultivate in coco coir perlite mix with added microbes giving us full control of the nutrient uptake of the plants

7. Do you use pesticides or beneficial insects? If yes to either, what do you use?

We use beneficial insects, Rove Beetles, Amblyseius Andersonis, Nematodes,

Minute Pirate Bugs

8. What price point(s) do you currently have on the recreational market?

Prices to the Retailers - 1g-\$4.00, 3.5g-\$13.33, 7g-\$24.00, 14g-\$42.50, 28g-\$82.00

Prices to the Customer - 1g-\$12.00, 3.5g-\$40.00, 7g-\$72.00, 14g-\$128.00, 28g-\$246.00

## Farm Information Questionnaire

9. Do you do terpene testing on your products?

We terpene tests all of our strains which we list on each package highest to lowest.

10. What lab(s) do you use when sending products out to be tested?

Analytical 360

11. Do you grow certain strains or do you like to alternate? Are you constantly hunting for more?

We are constantly phenohunting to keep up with market demand. We keep a core set but rotate the new strains depending on demand.

12. What are your favorite strains to grow & why?

We don't have a particular favorite strain, the thing we like the most about cannabis is their individuality.

13. Do you list where your genetics come from? (If no, why not?)

We don't list it on the packaging however, we have the lineage of most of the strains if requested.

14. If you offer concentrates, what is your extraction method?

No we are not currently offering concentrates.

15. Do you offer products with multiple extraction methods? If yes, what are they?

NA

16. If you are an extraction company, do you grow your own flower to extract or outsource?

NA

17. If you make edibles, how do you infuse them? (Ex: Co2, Coconut oil, MCT oil, etc.)

NA
